Getting Started

E-Wallet is a completely free, user friendly and secure mobile application providing you a seamless and unprecedently marvelous e-transaction experience. With simply a phone number, E-Wallet allows you to create an account to conveniently perform digital money transfer, debit card linkage and money top-up or withdrawal. The features of E-Wallet can throb and revitalize your e-transaction process.

System Requirements

E-Wallet needs several requirements to be met so that the application can operate properly on your mobile phone. The following requirements should be satisfied:

- Android operating system version 6.0.0 or above
- Network services enabled

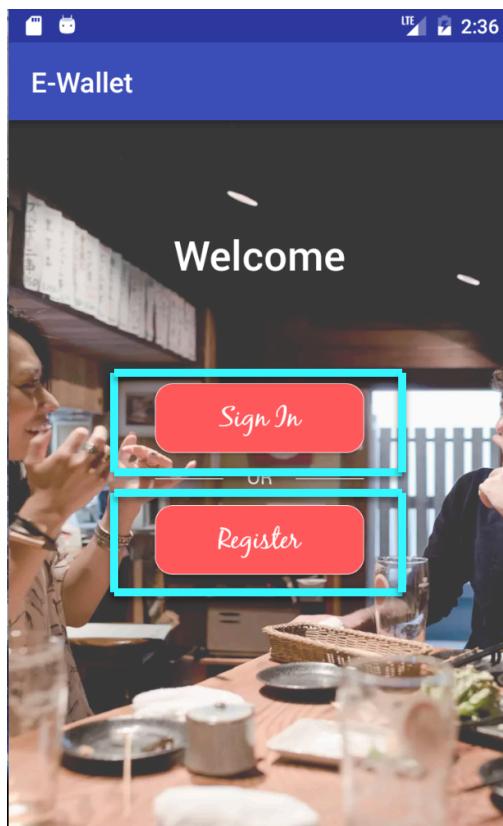

If the above requirements are satisfied, you can now download and run E-Wallet.

Registering an account

Basics

To use the functions offered by E-wallet, you should first create an account. The account records your account balance and connected debit cards so that you can transfer money quickly and effectively afterward.

- Once you open the E-Wallet app, you can see two buttons, “**Sign In**” and “**Register**”.

- Select “**Register**”, and you can see there are some required fields to fill in, such as **FIRST NAME**, **LAST NAME**, **PASSWORD** and **PHONE**.

Note: Make sure you enter valid data; otherwise, error messages will pop up. The requirement for each field is as below:

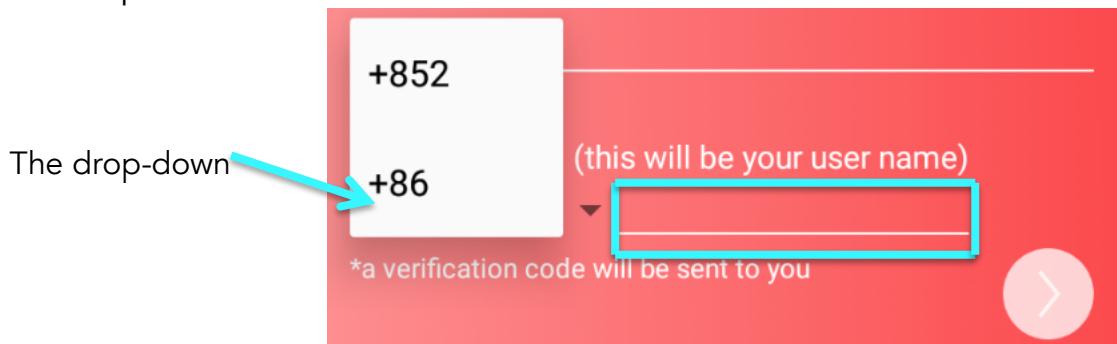

- FIRST, LAST NAME:** starts with capital letter
- PASSWORD:** consists of digit(s), capital and small letter(s) longer than 4 characters in total
- CONFIRM PASSWORD:** matches **Password**

Filling in personal information

- To fill in your **FIRST NAME**, **LAST NAME** and **(CONFIRM) PASSWORD**, click on the space above the white lines and then enter your information correctly.

The screenshot shows the 'Welcome to E-Wallet' screen. It has fields for 'FIRST NAME*' (containing 'Jay'), 'LAST NAME*' (containing 'Siu'), 'PASSWORD*' (containing dots), 'CONFIRM PASSWORD*' (containing dots), and 'PHONE*' (containing '+852' and '5932****'). A note says '(this will be your user name)'. Below the phone field is a note: '*a verification code will be sent to you' and a circular button with a right-pointing arrow.

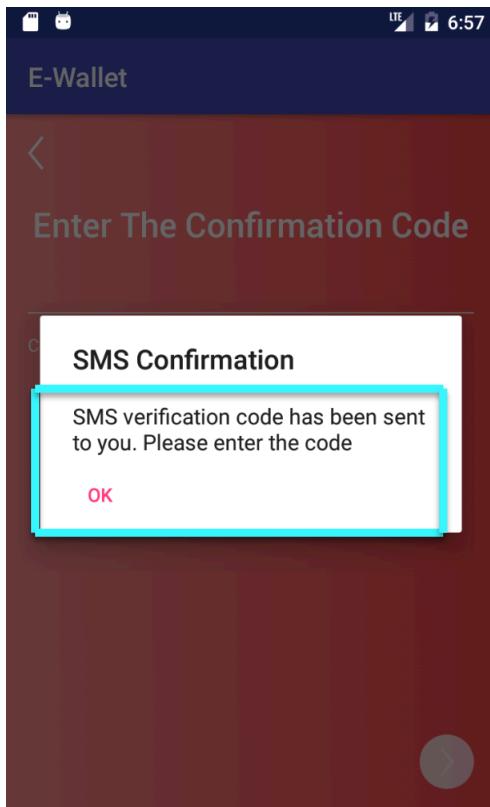

- To fill in your phone number, first click the drop-down under **PHONE**. Select the corresponding country code of your phone number and then enter the number on the right hand side of the drop-down.

- If you have filled in all the fields, you can press the circular button at the lower right to proceed for verification.

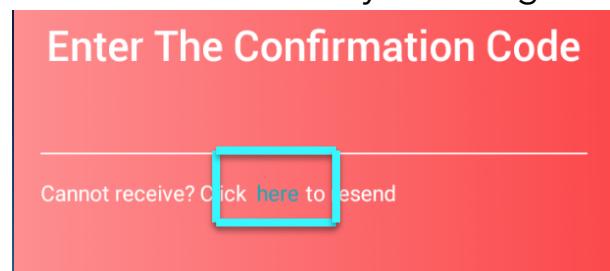

Verifying phone number

- If you have entered valid information previously, you should be notified by a dialog that “**SMS verification code has been sent to you. Please enter the code**”.

- Press “**OK**” to cancel the alert. Meanwhile you should receive an SMS from E-wallet containing the confirmation code.
- Enter the confirmation code, and then press the circular button at the lower right.
- If you enter the correct confirmation code, you will be directed to the main page of E-Wallet.

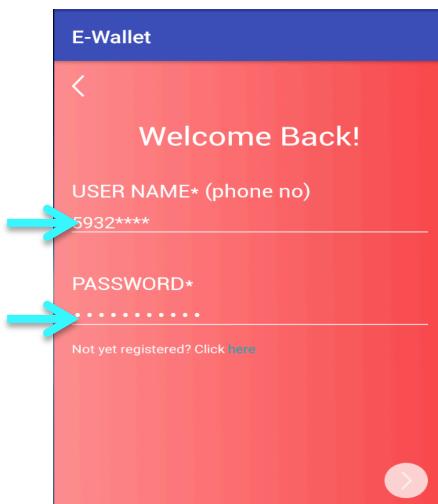

Note: The confirmation code can only be used once. If you mistype the code, you have to resend a new SMS by selecting “**here**”.

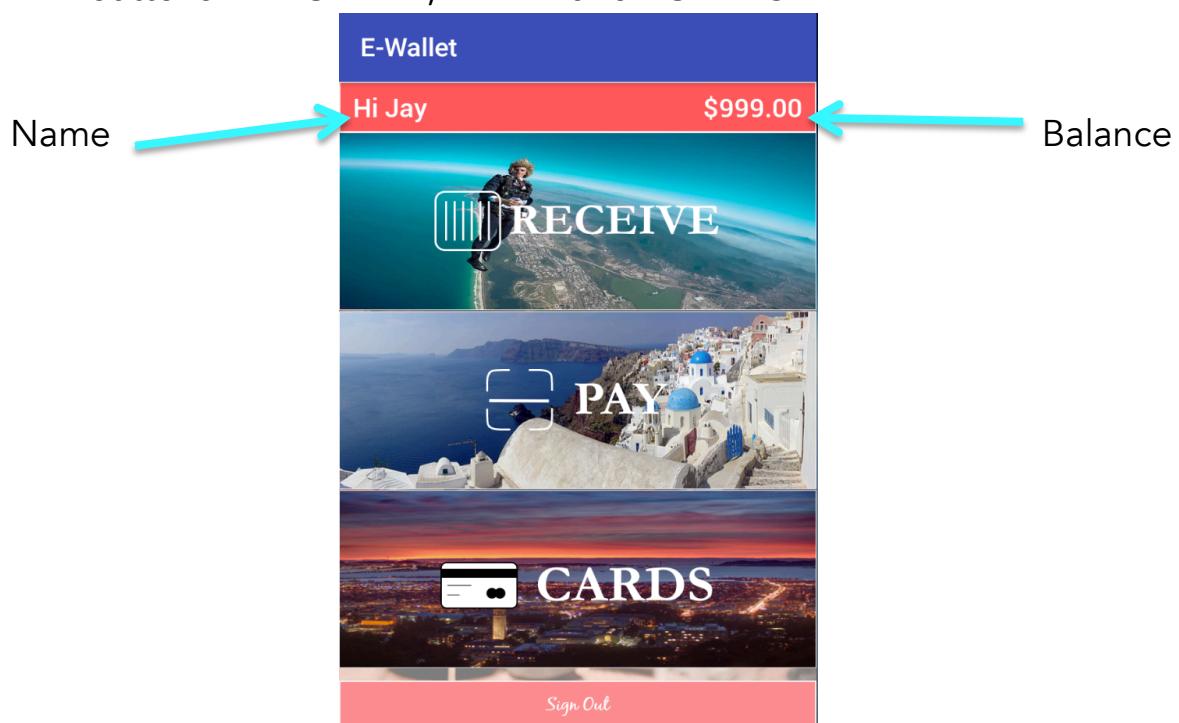

Signing In

If you already have an account, you can access the main page by simply logging into your account.

- Once you open the application, press the “**Sign In**” button.
- After that, click on the space above the white lines, and fill in your “**PHONE**” and “**PASSWORD**”.

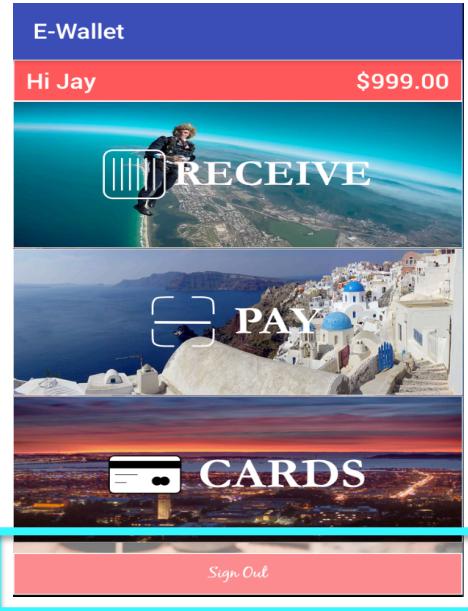

- Finally press the circular button at the lower right, and you will be logged into the main page.
- You can see your name, account balance, and three labeled buttons: “**RECEIVE**”, “**PAY**” and “**CARDS**”.

Signing Out

- To log out, press the button “**Sign Out**” at the bottom of the main page.

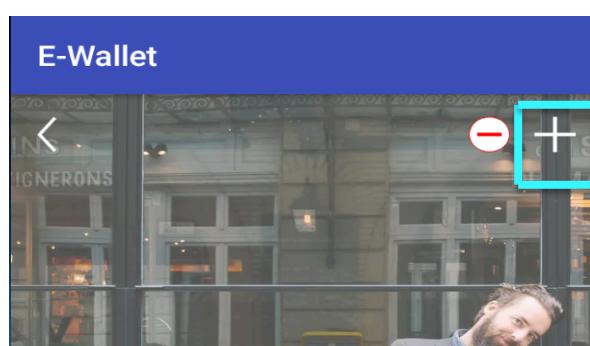

Managing Debit Cards

E-Wallet allows you to link/delete your debit card(s) to/from your account so that you can top-up from and withdraw to the connected debit card(s).

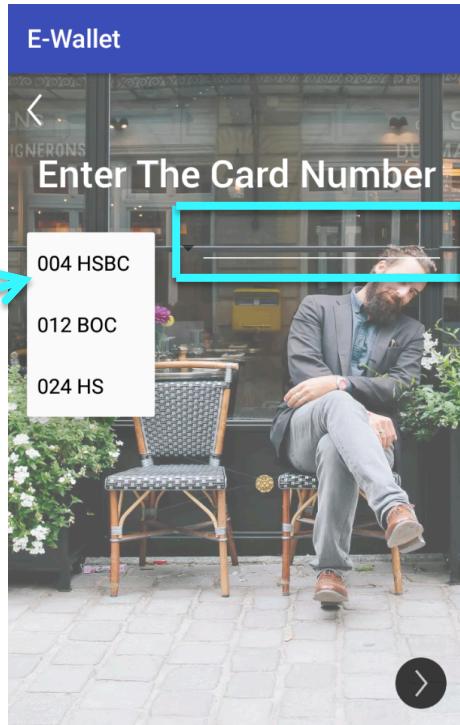

Adding a card

- After you sign in or register a new account successfully, you should see the main page.
- Select “**CARDS**”, and you can see a “+” and a “-” at the top right. Select “+”.

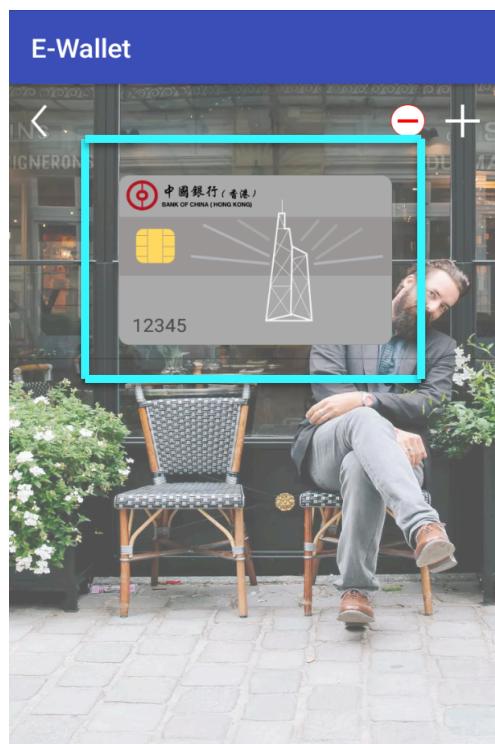

- Click the drop-down to choose the type of debit card you want to link. For example, “**BOC**”.
- Then, enter the debit card number, e.g. 12345, and press the button at the bottom right.

The drop-down

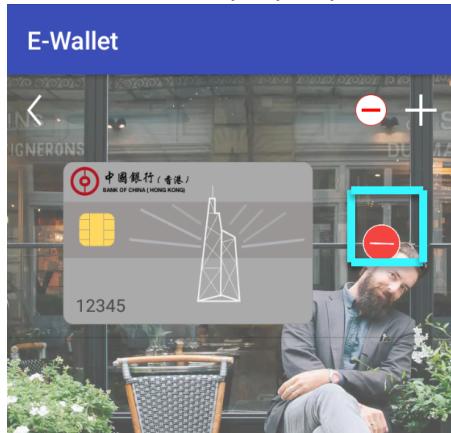

- You can see a virtual BOC debit card with the card number attached.

Note: You can link up to 3 debit cards.

Deleting a card

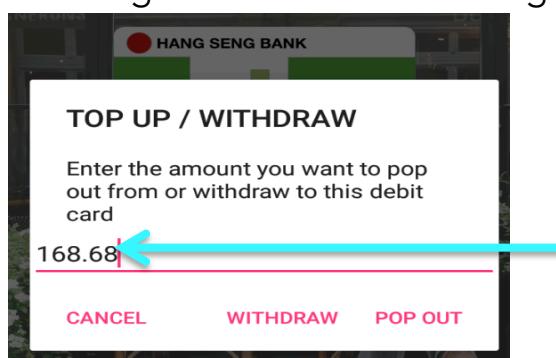

- To delete an associated card, select “-” at the top right.
- You can see a new “-” button pop up to the right of the card(s).

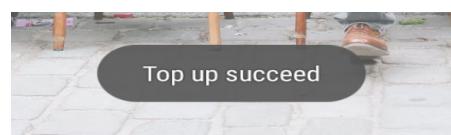

- Say you want to delete “**BOC 12345**” card, press the “-” button to the right of that card. You should see the card is gone.

Topping-up from/ Withdrawing to a card

- If you have debit card(s) linked, just click on the chosen card.
- You should see a dialog with a fuchsia flickering cursor.

- Enter the amount you want to top-up/withdraw, select “**POP OUT**” or “**WITHDRAW**”.
- To cancel top-up/withdrawal, just select “**CANCEL**”.
- You should see a temporal reminder at the bottom showing “**Top up succeed**” or “**Withdraw succeed**”. Your balance will be updated too.

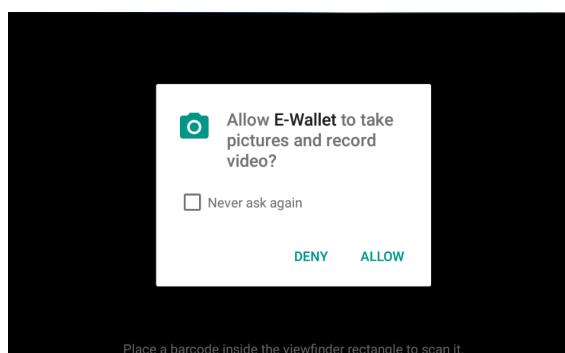

Transferring Money

E-Wallet aims to provide you a convenient way to transfer money through QR-code.

Paying

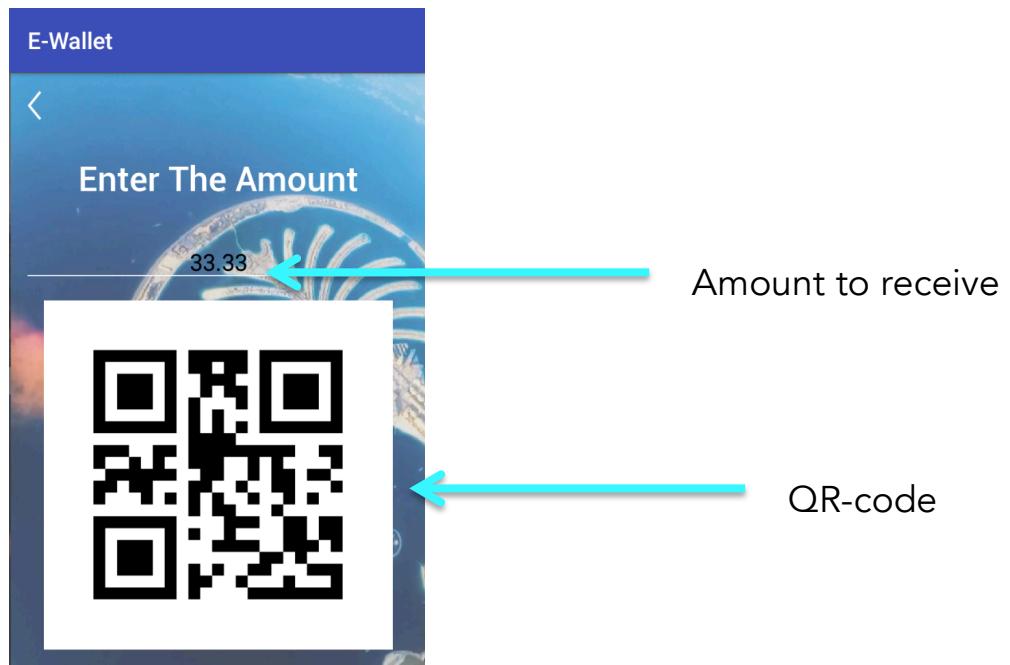

- On the main page, select “**PAY**”. For information about accessing the main page, see “**Registering an account**” or “**Sign In**” on P.3 and P.6.
- You can see the camera is turned on.

- Allow E-Wallet to access your camera, and then place the QR-code within the viewfinder rectangle to scan.
- You should see a reminder at the bottom showing “**Transaction Complete**”, and your balance will be updated.

Receiving

- On the main page, select “**RECEIVE**”.
- Enter the amount to receive. You should see a QR-code after you close the keyboard.

- Wait for the person to pay to scan your QR-code.
- After the person scans the QR-code, you should see a "**Transaction Complete**" reminder, and your balance will be updated.
